

The following are care and maintenance instructions for all custom digital solutions. These instructions should be followed by your employees and/or maintenance personnel as failure to follow them will irrevocably void the warranty.

MAINTENANCE

Identity Ink's custom digital solutions are virtually maintenance free. No special care is necessary. Normal cleaning with a mild window cleaner is ideal, such as a simple soap/water solution, finish by drying with a lint free cleaning cloth or similar soft cloth. It is not recommended that anything abrasive be used. The frequency of cleaning will not affect the film in any way.

CAUTION

- Do not use glass cleaner or other ammonia based cleaners as these may react with the inks used.
- Do not use abrasive cleaners on custom digital solutions.
- Do not drill or cut the custom digital solutions.

WARRANTY

The Identity Ink custom digital solutions will be free from defects in material and manufacture for a period of five (5) years from the date of installation.

If the custom digital solutions are proven to be defective within the warranty period stated above, your exclusive remedy and Identity Ink's sole obligation shall be, at Identity Ink's option, to replace or repair the custom digital solutions or refund the purchase price of the products.

Except where prohibited by law, Identity Ink Ltd. will not be liable for any loss or damage arising from the Identity Ink product, whether direct, indirect, special, incidental, or consequential, regardless of the legal theory asserted, including contract, warranty, negligence, or strict liability.
